

Onto-animal tools for reusing ontologies, generating and editing ontology terms, and dereferencing ontology terms

Yongqun “Oliver” He¹, Jie Zheng², Asiyah Yu Lin¹. ¹University of Michigan, ²University of Pennsylvania, USA

Summary of Onto-animal tools and features

Ontology development:

- **OntoFox**: reuse existing terms. Implement and extend the “Minimum Information to Reference an External Ontology Term” (**MIREOT**)
- **Ontodog**: reuse & “community view”
- **Ontorat**: generate new and edit existing

Display and term dereferencing:

- **Ontobee**: mostly OBO library ontologies

Ontology comparison:

- **Ontobee**: Compare 2 or 3 ontologies

Ontology-based data analysis:

- **Ontobat**: Still under construction

Usage: Quite popular 😊 Thanks!

Question:

Why give names of Onto- “*animal*”?

Answer: Ha, you know ... 😊
